LIP FILLER CORRECTION MASTERCLASS

2 DAY COURSE, LONDON

This exciting, one of a kind course helps practitioners to confidently manage and retreat lips which have been distorted by poor previous filler placement. Whether it's migration, distortion, asymmetry, lumps or unnatural appearance, our delegates will become well equipped to deal with any presentation. Day 1 covers the assessment and resolution of complications, and day 2 covers retreatment 4 weeks later.

WHAT TO EXPECT

- **Small groups-** no class has more than 6 delegates to ensure you get the most out of your session.
- **Live models and hands on-** we believe in the importance of hands on experience, particularly when it comes to complex cases. All our delegates will get to practice filler dissolving as well as retreatment under close supervision of our advanced aesthetic trainers.
- **New and exciting dissolving techniques-** Injectable hyaluronidase is not our only option anymore. Learn how and when to use Topilase filler dissolving agent to resolve poor filler results without injections.
- **Always evidence based-** We've consolidated the research and data so that you don't have to.
- **Simplified treatment planning-** learn a simplified algorithm to help you manage cases effectively when you're on clinic.
- **Price £2000-** for a limited introductory period
